Objective

The event aims at a closer exchange of young researchers at master or PhD student level of the GAMM community. Participants are encouraged to give their own presentations. The organisers want to emphasise that the event is not a conference set-up and the topics of the presentations may also include unfinished results, ideas or questions of a more general nature. A key feature of the event will be a talk from industry on alternative career paths after the doctorate.

- ✓ Ability to hold your own presentation
- ✓ Insights into career paths in industry after the doctorate
- ✓ Interdisciplinary exchange with other researchers at PhD student level

Due to the multidisciplinary nature of the topic, we envisage contributions from mathematics as well as engineering perspectives.

Organizers

Christoph Böhm (Leibniz University Hannover),
Hendrik Geisler (Leibniz University Hannover),
Mischa Blaszczyk (Ruhr-University Bochum),
Katharina Klioba (Hamburg University of Technology)
