Online Pre-Event

How to Science Slam | May 22nd, 5pm

Objective

The event aims at a closer exchange of young researchers at master or PhD student level within the GAMM community. In this context, a key feature will be a talk from industry on alternative career paths after the doctorate, opening up the conversation. On the other hand, we encourage all participants to give their own talks. The intention of the event is to create a non-conference feeling, and rather give everyone the opportunity to present frankly and in an entertaining way. Thus, the presentations may also include unfinished results, ideas or questions of a more general nature. In case you are not yet sure of what a science slam includes and how to do it, we will also host an online pre-event introducing you to this world.

- ✓ Opportunity to give your own talk
- ✓ Insights into career paths in industry after the doctorate
- ✓ Interdisciplinary exchange with researchers at PhD student level

Organizers

Miriam Kick (Leibniz Universität Hannover),
Felix Klempt (Leibniz Universität Hannover),
Mischa Blaszczyk (Ruhr-Universität Bochum),
Hendrik Haddenhorst (Ruhr-Universität Bochum),
Yannik Hüpel (Technische Universität Braunschweig),
Henrik Wyszka (Universität Hamburg)
